## **DETAILED ACTION**

### ***Pending Claims***

Claims 33-82 are pending, of which claims 33-75 are withdrawn from consideration.

### ***Election/Restrictions***

1. Applicant's election of Group II (claims 76-82) in the reply filed on May 5, 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 33-75 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in the reply filed on May 5, 2006.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 76-82 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 76-82 feature the transitional language *comprising* to include components (a), (b), and (c) in their composition. The use of the word *comprising* leaves the scope of the claims open to materials other than components (a), (b), and (c). However, there appears to be a conflict with

the transitional language and the proportions of components (a), (b), and (c) set forth in the claims. Components (a), (b), and (c) add up to 100%; hence it is unclear if the scope is truly open to other materials. Support for this claimed embodiment can be found in Example 3 of the instant specification (*see page 14*). There appears to be nothing else present in the exemplary composition. In light of this, it appears that the transitional language should be changed to *consisting of*.

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 76-82 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for *a hydrophobic surface treatment composition* *consisting of* *components (a), (b), and (c)*, does not reasonably provide enablement for *a hydrophobic surface treatment composition* *comprising* *components (a), (b), and (c)*. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims.

General support for the instantly claimed embodiment can be found in Example 3 of the specification (*see page 14*). The language *comprising* leaves the scope of the claims open to materials other than components (a), (b), and (c); however, the specification does not support the presence of any other materials. In light of this, it appears that the transitional language should be changed to *consisting of*.

Furthermore, it appears that the scope of this embodiment is only enabled with the use of a hydrocarbon solvent (boiling point ~320 °F) – not any solvent.

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
